# Stop Thief!

THE "Jumbo" gas burner shown here at the right, (actual size) is a robber on any gas lighting fixture in Chicago. If you have one, get rid of it! It makes high gas bills and causes a great many of the complaints that come to us.

This Is the "Jumbo" Gas Burnes

Use mantle burners to get more light with less gas. Burning five hours a day for a month, the "Jumbo" consumes \$2.30 worth of gas; a "Junior" mantle burner, in the same time, consumes only 39 cents worth, or \$1.91 less, and gives much more light.

Bananas.

The banana is a perennial herbayear from an underground root stock with a stem or stalk from 10 to 15 feet high above the ground. The plant has drooping leaves, but no branches like fruit trees of the north countries. Each stalk produces one large cluster of fruit. After fruiting, the stalk is cut down to the surface of the ground and grows up again from the root.

Colorado's Wonderland,

The Garden of the Gods is a tract of land, about 500 acres in extent, near Colorado Springs, Colo. It abounds in weird and fantastic pinnacles of red and white sandstone, some of them more than 300 feet high. Among the chief features are the Cathedral spires, the Balanced rock, etc. The gateway of the garden consists of two enormous masses of red sandstone, 330 feet high, sufficiently far apart for the roadway to pass between

Our Different Worlds.

I once stood in a dome with different colored glass in each window. Thus four men touching each other might each see a different scene; a red ocean, a green city, blue fields, and yellow mountains. A rare man might climb to the top of the dome and see the whole circle of the landscape under the white light of a pure atmosphere.
